## Architrave [AR]

### Architrave Profiles | Solid Wood Architraves

Timber architraves or mould architraves for door surrounds or ground openings.

Most of our architraves can be manufactured in the timber species of your choice. The most popular wood species are Oak and we also offer American Oak architraves, European oak architraves and ash architraves. Oak architraves are highly recommended for external applications. Unlike architraves or mould architraves, our architraves are very good options. Hardwood and softwood choices are available on our website [click here](#) for more timber info and prices. Buy hardwood architraves online from WoodChoose.

If you need to buy bespoke architraves or architraves to match your door, please ask for help with this too - [click here](#) for more information on our bespoke service.

Also for architects and designers, download our architrave profiles in PDF drawings. [Click here](#) for more about DWG architrave profiles and CAD architraves.

## Architrave 01 [AR01]

Moulded architrave

### Common Uses

For use for around door frames and window surrounds

### Usage

This item is recommended for external use

Width: 55 mm - Thickness: 21 mm

### Top Tip

When choosing an architrave for a door - consider a slightly thicker architrave to this helps break the joint where they meet. Alternatively choose an architrave blind

### Notes

For customers who are looking for? Need a different size, slightly different finish or want to know what you have? All in the wood of your choice and in any quantity contact us - [info@woodchoose.co.uk](mailto:info@woodchoose.co.uk). Anything made of wood, we can source it.
